SUMMARY

I have 3 year of experience in backend development, with Java as the main language of choice. I have experience using Spring framework and Framework, works with both SQL databases (SQL Server and MySQL and PostgreSQL) works with ORM

EDUCATION

Aptech Computer Education 2021 - 2023

INFORMATION TECHNOLOGY

SKILLS

Programming	Java,C,JavaScript,C#,Rust
Frameworks	Spring Boot, Spring data JPA,Hibernate,Axum,Mulesoft
Databases	MySQL, Oracle DB, Redis
Others	Microservice, Git, Linux,grafana ,prometheus.keycloak ...

WORK EXPERIENCE

TSCORE

(12/2025 - Present)

Customer	Techcombank
Project description	This is a major project by Techcombank to integrate the new T24 system.
Team size	7
Role	mulesoft developer
My works	Receive information from both API ends and use DataWeave to integrate the APIs together.
Technology	- java,mulesoft,DataWeave,jenkin,opensearch

TPbank XLOS

(07/2025 - 10/2025)

Customer	TPBank

Project description	XLOS was created to serve customers who can borrow to buy cars and real estate. The application allows TPBank agents to check loan limits for disbursement. In addition, the application is integrated with many sources to check customer credit, such as CIC, S11T, and others
Team size	18
Role	backend developer
My works	develop and project using spring boot library to write API for Front End, build and deploy to
Technology	Microservices, Java Spring Framework, Hibernate,OKD, Oracle

TPbank AGENCY

(03/2025 - 07/2025)

Customer	Vietcombank
Project description	AGENCY is an application that helps agents carry out customer transactions, such as withdrawing money, transferring money, and depositing money. With just a chip-embedded citizen ID card, transactions can be carried out easily at the counter.
Team size	18
Role	backend developer
My works	develop and project using spring boot library to write API for Front End, build and deploy to server
Technology	Microservices, Java Spring Framework, Hibernate,OKD, Oracle

VSS (VIETCOMBANK SECURITIES SERVICE)

(10/2024 - 02/2025)

Customer	Vietcombank
Project description	VSS is a project of VIETCOMBANK, the project aims to help customers deposit and manage securities at the bank.
Team size	18
Role	backend developer
My works	develop and project using spring boot library to write API for Front End, build and deploy to server
Technology	- spring boot ,redis ,Kubernetes,grafana,openshift,nextjs...

M&A (Mergers And Acquisitions)

(05/2024 - 10/2024)

Customer	vietinbank

Project description	To serve the buying and selling needs of businesses, develop a scalable e-commerce platform that supports various models like B2B and B2C. The platform should offer advanced search, secure payment processing, and seamless transactions. Include features like promotional tools, real-time analytics, and robust security measures. Additionally, customer support tools are essential to manage inquiries effectively. By focusing on these elements, businesses can optimize their sales processes, improve customer experiences, and drive growth
Team size	12
Role	backend developer
My works	Designed and created database tables according to requirements, ensuring data integrity and optimized performance, and developed and maintained APIs, focusing on endpoint design, secure implementation, input validation, testing, performance monitoring, and continuous updates
Technology	Java, Spring Boot, Microservice, K8S, Jenkins, Redis, Postgresql (BD Used), JPA

ESMART

(01/2024 - 05/2024)

Customer	Internal project
Project description	Is a website for testing and practicing skills for employees and based on the results of the test to evaluate capacity
Team size	14
Role	backend developer
My works	Designed and created database tables according to requirements, ensuring data integrity and optimized performance, and developed and maintained APIs, focusing on endpoint design, secure implementation, input validation, testing, performance monitoring, and continuous updates
Technology	Java, Spring Boot, Microservice, K8S,, Redis

TMS

(08/2023 - 11/2023)

Customer	Internal project
Project description	TMS helps solve problems for sales by helping to count potential purchases. Every time an employee enters the sales system, they will receive potential customer information to make phone calls.
Team size	7
role	backend developer
My works	Design API based on available database, write database functions to get users to call according to each given status, write API for Front End to call

Technology	spring boot,jdbc template

LGSP - Local Government Service Platform

(03/2023 - 06/2023)

Customer	GTEL
Project description	The data integration and sharing platform is deployed at the provincial and ministerial levels.
Team size	12
Role	backend developer
My works	Designed and created database tables according to requirements, ensuring data integrity and optimized performance, and developed and maintained APIs, focusing on endpoint design, secure implementation, input validation, testing, performance monitoring, and continuous updates
Technology	Spring boot
